"Place of Small Springs,"

The history of the aborigines in Arizona is extensive, for on plains, on mesas, and in the cliffs there are many ruins of places occupied by the early people. Some of these ruing must be very old. However, it is believed that very old. However, it is believed that the number of people living in the region at any time may not have been great, for the aborigines frequently moved from place to place. The early expeditions of the Spanish explorers found many pueblos. The first Spaniard to enter Arizona was Warros de Niza, a Franciscan friar, who crossed the southwest corner in 1539. A year later Niza led Coronado to the Pueblo country and two small expeditions.
